

**Powered air purifying respirator CleanAIR® Basic 2000 provides efficient filtration of air contaminated with particles such as dust, smoke, toxic and non-toxic fumes, solid and liquid aerosols, bacteria and viruses. The respirator unit is popular for its compact shape and low weight.**

System CA BASIC is supplied with two product modifications which are compatible with a wide range of CleanAIR® headtops.

#### CleanAIR® Basic FLOW CONTROL

Powered air purifying respirator with electronic control of constant airflow and advanced system for warning the wearer in the case of low airflow. Additionally, the respirator informs the wearer about the level of filter clogging and the battery charge level.

#### CleanAIR® Basic DUAL FLOW

Economical version of the respirator which allows the user to choose between two levels of airflow ECO / TURBO and simple operation.

#### Advantages

- Compact shape
- Low weight (900 g including a filter and a battery)
- Control system of constant airflow
- Adjustable airflow (140 to 210 lpm)
- Advanced electronic system for warning the wearer
- Controlling keyboard with a clearly arranged LED panel
- Easily exchangeable NIMH battery

#### Areas of application

- Dusty industrial environments – welding, grinding
- Automotive industry
- Building industry
- Food processing industry

#### Technical data

Air flow	140–210 lpm – adjustable in 8 levels (160 lpm and 200 lpm CAB Dual Flow)
Weight	900 g (including battery)
Noisiness	max. 61 dB
Dimensions	191 mm / 173 mm / 104 mm
Battery	NIMH 4,8 V / 4,5 Ah
Certification	EN 12941 TH2/TH3 PSL (CAB Flow Control) EN 12941 TH1 PSL (CAB Dual Flow)
