INDUSTRIAL VACUUM MINIBULL

SINGLEPHASE

The Minibull is a powerful and versatile industrial vacuum, useful for different professional applications. This vacuum cleaner is equipped with two By-Pass motors that work in parallel and ensure maximum suction performance. The filter is in sturdy polyester M Class (1µ filtration efficiency) to stop even fine dust. A different filter can be installed on this model depending on the application. Teflon water-repellent filters, Nomex 250°C resistant filters, and filters with **PTFE** treatment for more binding and difficult dust are also available. This **industrial vacuum** is equipped with a large 45 Lt detachable container that allows the operator to empty the vacuumed material easily. Disposable collection bags can also be used. A floating system can be provided in the container to vacuum liquids in complete safety.

POWER

2,6 kW

SURFACE

15.000 cm2

CAPACITY

45 Lt

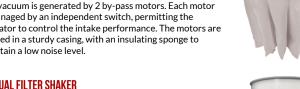

HIGHLIGHTS

The vacuum is generated by 2 by-pass motors. Each motor is managed by an independent switch, permitting the operator to control the intake performance. The motors are located in a sturdy casing, with an insulating sponge to maintain a low noise level.

MANUAL FILTER SHAKER

On one side of the filter chamber there is an ergonomic $\ manual \ shaker \ through \ which \ the \ operator \ can \ easily \ and$ quickly clean the filter, removing any dust and debris from its surface. Thanks to this smart cleaning system the $\,$ operator can carry on working without needing to change or wash the filter.

FILTERING ELEMENT

The filtration is guaranteed by an M class polyester filter. The star shape enables air to flow through the filter even when it is dirty. The fabric of the filter is classified as $\boldsymbol{\mathsf{M}}$ Class (BIA | $\dot{\rm EN}$ 60335-2-69). This means that all particles till 1 micron are stopped by the filter so as to protect the $\,$ motors and the operator around the vacuum cleaner.

COLLECTION BIN

The material is collected inside a painted container equipped with a metal handle which enables the bin to be detached from the machine. Thanks to its 4 swiveling wheels, the bin can be easily moved and emptied.
