

# **Conseal Touch-Up**

### **Product description**

This is a one component physically drying acrylic coating. It has a matt finish. It is a high build product. It is fast drying. It can be used direct to metal. To be used as topcoat in atmospheric environments. It can be applied at sub zero surface temperatures.

### Typical use

Protective:

Recommended for refineries, power plants, bridges and buildings. Suitable for a wide range of industrial structures.

### **Approvals and certificates**

Grain, Newcastle Occupational Health

Additional certificates and approvals may be available on request.

#### **Colours**

according to colour card and Multicolor Industry tinting system (MCI)

### **Product data**

Property	Test/Standard	Description	
Solids by volume	ISO 3233	49 ± 2 %	
Gloss level (60 °)	ISO 2813	matt (0-35)	
Flash point	ISO 3679 Method 1	25 °C	
VOC-USA / VOC Hong Kong	EPA Method 24	463 g/l	
VOC-Solvent Emission Directive	SED (1999/13/EC)	386 g/kg	

The provided data is typical for factory produced products, subject to slight variation depending on colour. Gloss level: According to Jotun Performance Coatings' definition.

## Recommended film thickness per coat

Film thickness and spreading rate	Dry film thickness	Wet film thickness	Theoretical spreading rate
	(µm)	(µm)	(m²/l)
Minimum	75	150	6,5
Maximum	120	245	4,1
Typical	120	245	4,1

## **Surface preparation**

Date of issue: 27 November 2014 Page: 1/4

# **Technical Data Sheet Conseal Touch-Up**

To secure lasting adhesion to the subsequent product all surfaces shall be clean, dry and free from any contamination.

### Surface preparation summary table

	Surface	Surface preparation			
Substrate	Minimum	Recommended			
Coated surfaces	Clean, dry and undamaged compatible coating (ISO 12944-4 6.1)	Clean, dry and undamaged compatible coating (ISO 12944-4 6.1)			
Carbon steel	St 2 (ISO 8501-1)	Sa 2½ (ISO 8501-1)			
Shop primed steel	Clean, dry and undamaged shop primer (ISO 12944-4 6.1)	Sa 2 (ISO 8501-1)			
Aluminium	The surface shall be hand or machine abraded with non-metallic abrasives or bonded fibre machine or hand abrasive pads to impart a scratch pattern to the surface and to remove all polish from the surface.	Cleanliness corresponding to description of Sa 1 (ISO 8501-1)			
Galvanised steel	The surface shall be clean, dry and appear with a rough and dull profile.	Light brush blasting using non- metallic abrasive leaving a clean, rough and even pattern.			

### Product mixing ratio (by volume)

Single pack

### Thinner/Cleaning solvent

Thinner: Jotun Thinner No. 7

### **Guiding data for airless spray**

Nozzle tip (inch/1000): 17-23

Pressure at nozzle (minimum): 150 bar/2100 psi

## **Drying and Curing time**

Substrate temperature	5 °C	10 °C	23 °C	40 °C
Surface (touch) dry	40 min	30 min	20 min	15 min
Walk-on-dry	17 h	11 h	10 h	6 h
Dried to over coat, minimum	3 h	2.5 h	2 h	1.5 h

Drying and curing times are determined under controlled temperatures and relative humidity below 85%, and within the DFT range of the product.

Surface (touch) dry: The state of drying when slight pressure with a finger does not leave an imprint or reveal tackiness. Dry sand sprinkled on the surface can be brushed off without sticking to or causing damage to the surface.

Date of issue: 27 November 2014 Page: 2/4

This Technical Data Sheet supersedes those previously issued.

# **Technical Data Sheet Conseal Touch-Up**

Walk-on-dry: Minimum time before the coating can tolerate normal foot traffic without permanent marks, imprints or other physical damage.

Dried to over coat, minimum: The shortest time allowed before the next coat can be applied.

### **Heat resistance**

#### **Temperature**

	Continuous	Peak	
Dry, atmospheric	60 °C	60 °C	

The dry coating film will be gradually softer as temperature increases. Correct procedures for handling and stacking must be established, depending on environmental conditions. Protective properties will not be influenced.

Peak temperature duration max. 1 hour.

The temperatures listed relate to retention of protective properties. Aesthetic properties may suffer at these temperatures.

### **Product compatibility**

Depending on the actual exposure of the coating system, various primers and topcoats can be used in combination with this product. Some examples are shown below. Contact Jotun for specific system recommendation.

Previous coat: acrylic, epoxy, zinc epoxy, shop primer

Subsequent coat: acrylic

## Packaging (typical)

	Volume (litres)	Size of containers (litres)
Conseal Touch-Up	5 / 20	5 / 20

The volume stated is for factory made colours. Note that local variants in pack size and filled volumes can vary due to local regulations.

## **Storage**

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

#### Shelf life at 23 °C

Conseal Touch-Up 48 month(s)

In some markets commercial shelf life can be dictated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection.

Date of issue: 27 November 2014 Page: 3/4

This Technical Data Sheet supersedes those previously issued.

### **Caution**

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Jotun's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Jotun representative for approval before commencing the work.

### **Health and safety**

Please observe the precautionary notices displayed on the container. Use under well ventilated conditions. Do not inhale spray mist. Avoid skin contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water. Eyes should be well flushed with water and medical attention sought immediately.

### **Colour variation**

Products primarily meant for use as primers and antifoulings may have slight color variations from batch to batch. Such products may fade and chalk when exposed to sunlight and weathering.

### **Disclaimer**

The information in this document is given to the best of Jotun's knowledge, based on laboratory testing and practical experience. Jotun's products are considered as semi-finished goods and as such, products are often used under conditions beyond Jotun's control. Jotun cannot guarantee anything but the quality of the product itself. Minor product variations may be implemented in order to comply with local requirements. Jotun reserves the right to change the given data without further notice.

Users should always consult Jotun for specific guidance on the general suitability of this product for their needs and specific application practices.
