CRAFT®

WP-20

WP-20 torches are designed for long-term, trouble-free service and offer consistent welding performance in general applications.

Efficient around-the-head cooling design helps extend torch life and minimizes downtime due to overheating (all models).

Compact and lightweight torch body offers good torch control and increases operator comfort (all models).

Gas control valve eases gas flow adjustment (WP-20V).

Pencil-style head allows for greater access into hard-to-reach joints (WP-20P).

Mechanical fittings provide a secure connection to prevent gas or water leakage and allow easy hose replacement (WP-20M and WP-20V).

Quick Specs

Hand-held Water-cooled

WP-20/20M/20V

- 250 amp DC, 180 amp AC (100% duty cycle)
- Electrode range: .020" – 1/8" (0.5 – 3.2 mm)

WP-20P

- 225 amp AC/DC (100% duty cycle)
- Electrode range: .020" – 1/8" (0.5 – 3.2 mm)

WP-25

- 200 amp AC/DC (100% duty cycle)
- Electrode range: .020" – 1/8" (0.5 – 3.2 mm)
